

Dear Colleagues,

We have a pleasure to invite you to International Conference on Development and Applications of Nuclear Technologies NUTECH 2023. The conference will be held from 20th to 22nd of September 2023 at AGH University of Science Technology in Krakow, Poland.

NUTECH 2023 is a triannual conference jointly organized by AGH-UST together with Institute of Nuclear Chemistry and Technology in Warsaw, Polish Chemical Society and Polish Nuclear Society. It is a continuation of the National Symposia on Applications of Nuclear Techniques in Industry, Agriculture, Medicine and Environment Protection, which have been held in Poland since 1960. The NUTECH conference provides a platform for the nuclear science community to share the experience and to learn about the recent developments achieved in nuclear research and their practical applications.

NUTECH covers a wide range of topics that are related to different uses of nuclear technologies, ranging from nuclear energy to nuclear medicine and the whole spectrum of industrial applications of nuclear techniques.

You can find further information on the website: <http://nutech-2023.agh.edu.pl/>

We are looking forward to seeing you in Krakow for NUTECH 2023.

Sincerely,

NUTECH 2023
Organising Committee
