## **E-BEAM Services Introduces *EBXL*, an Optimized, Dedicated Crosslinking Solution Tailored for Cable, Sheet, and Foam Manufacturers Launching Fall 2024**

Lebanon, Ohio - [Date] - E-BEAM Services Inc., the largest provider of contract electron beam processing solutions in the U.S., proudly announces the launch of *EBXL*, a customized offering to for the cable, sheet, tubing and crosslinked foam sectors. This offering features the sustainability and efficiency of a world class 2 Mev electron beam accelerator, combined with a custom engineered handling system and matches them with E-BEAM Services' unparalleled sector expertise. E-BEAM recently expanded its Lebanon facility to develop state-of-the-art space to house this comprehensive and dedicated processing and expanded capacity.

Recognizing changing industry trends and emerging customer requirements, *EBXL* has been specifically engineered to efficiently crosslink wire and cable jacketing, film and sheet products as well as, with unique ultra-low tension capabilities, thin walled heat shrink and catheter tubing. Engineered for precision and reliability, this handling system sets this offering apart for optimal performance across various applications.

### Key Features of *EBXL*:

- Sector-Focused Electron Beam Expertise
- Enhanced and Specialized Processing Capabilities
- Dedicated Crosslinking Capacity for the Marketplace
- Precise, highly consistent dose delivery
- Sustainable processing
- Ultra-low tension handling capability
- Processes a wide range of material sizes
- E-BEAM's industry leading customer service and turnaround times

"We're thrilled to announce the launch of our new offering, *EBXL*, at our Lebanon, Ohio, facility. In addition to expanded capacity, this dedicated, optimized solution sets a new standard for crosslinking of wire, cable, tubing, and sheet, further demonstrating our continued commitment to

delivering innovative and world-class electron beam processing services," said Sam Strotman, Chief Operating Officer of E-BEAM Services Inc.

About E-BEAM Services:

E-BEAM Services, Inc. is the leading supplier of contract electron beam processing services for product sterilization/bioreduction and polymer product enhancement, with more than 500kW of installed accelerator capacity—enough to process a billion pounds of material annually. With a steadfast commitment to innovation and quality, E-BEAM Services empowers industries to enhance the performance, durability, and reliability of their products. E-BEAM is a privately owned corporation with locations in Lebanon, OH, and Cranbury, NJ,.
