

NINTH ANNUAL

Ad-Hoc Working Group Meeting

ALTERNATIVES TO HIGH-ACTIVITY RADIOACTIVE SOURCES

VIRTUAL MEETING
JULY 30-AUGUST 1, 2024 | 13:00 – 15:30 PM (CEST)

You are invited to attend the ninth annual meeting of the Ad Hoc Working Group on Alternatives to High-Activity Radioactive Sources. The focus of this meeting will center around applications of non-radioisotopic alternative technologies with particular emphasis on environmental challenges and climate change, risk mitigation of mobile radioactive sources through alternative technologies, and the economics of alternative technologies.

In addition, we invite all countries to participate in a facilitated dialogue concerning technical and policy considerations for the use of alternative technologies. This working group encourages and supports more robust collaboration which often results when people with different backgrounds, perspectives, and experiences are given the opportunity to contribute.

Topics to include:

- Climate change, mitigation, and green applications of alternative technologies
- Transportable eBeams
- Food processing and Sterile Insect Technique
- Special policy topic: The Justification Principle
- Small mobile sources and nondestructive testing alternatives
- Economics of alternative technology

**REGISTER
HERE**

A preliminary agenda is attached to this invitation letter. The meeting will be conducted in English. Please confirm your attendance by July 16, 2024 by scanning the QR Code or clicking the [Registration link](#), which will take you to the Whova registration page.
