

## ThreeRays and Aerial Sign Letter of Understanding to Expand Dosimetry Market in China and Asia

ThreeRays (Beijing) Technology Co., Ltd. (**ThreeRays**) and **Aerial**, a globally renowned provider of radiation processing dosimetry equipment from France, officially signed a Letter of Understanding during the ICARST 2025 conference at the IAEA Headquarters on April 8, 2025. ThreeRays will act as Aerial's authorized partner in China and throughout Asia, promoting its high-precision dosimetry equipment and alanine dosimeter products and services to drive technological advancements in the region's radiation processing industry.

Aerial is a world-leading supplier of radiation dosimetry solutions, with its more than 30 years experience in developing optical and ESR dosimetry equipment that are widely used in medical device sterilization and scientific research. This collaboration will combine ThreeRays' deep market expertise in China and Asia with Aerial's innovative technologies. Together, they will provide regional customers with more accurate and efficient radiation process monitoring and quality control services.

The General Manager of ThreeRays, Peng Wei, stated “this partnership represents a significant milestone in the field of quality control of radiation processing. We will accelerate the introduction of cutting-edge international technologies to promote standardization in Asia’s irradiation industry.” Aerial’s General Manager, Alain Strasser, emphasized that ThreeRays was chosen as a partner due to its outstanding market development capabilities and technical service system.

The two companies plan to launch product promotions and technical training programs in the near future to enhance quality control in irradiation applications across the Asia-Pacific region.
